FEEDING SUGGESTIONS

Adult Cats: The amount of food required each day will vary by activity level, temperament, and climate and should be adjusted accordingly using the chart below as a guide. Divide the recommended serving into two meals per day.

WEIGHT OF ADULT CAT

3 - 5 lb
5 - 10 lb
10 - 15 lb

DAILY AMOUNT*

Up to 1/2 cup
1/2 - 3/4 cups
3/4 - 1 1/4 cups

*One standard 8-oz measuring cup holds approx. 4 oz of food.

Kittens: Start your kittens on Star Pro[®] as soon as they begin to nibble on solid food (usually 3 to 5 weeks of age). Moisten with water and feed all that your kittens will consume in 10 minutes, three to four times per day. After weaning, at 6 to 8 weeks of age, dry or moistened food should be available at all times. If water is added, mix one part warm water with three parts Star Pro[®], changing frequently to ensure freshness.

Gestation and Lactation: Consumption will vary; therefore, feed the amount required to maintain good body condition. Food may need to be available at all times.

Water: Provide a source of fresh, clean water at all times.

CAUTION: Changes in pet food should be made gradually. Pet food should be stored in a well-ventilated, dry area protected from rodents and insects. Pet food is perishable. Do not feed moldy or insect-infested pet food to animals as it may cause illness or death.
